re Planning Application number:- 2021/91136 Having only received a letter dated 28/04/21 from Kirklees Council within the past week or two, and this being hand-delivered through our letterbox on a Sunday afternoon, we were somewhat taken aback by this planning application. Over the past 12 months or so, an application was posted on our local lamp posts regarding the application for a cattery at Mulberry Brook. Whilst we didn't object to this plan, the next thing to be installed at this site was a huge lodge, which the low-loader had great difficulty in siting, and definitely not cattery or cattery-office related we thought. In the weeks and months which followed we noticed the lodge being discreetly screened by trees, a concrete drive being laid, and huge electric gates being installed at the entrance. It would appear that, although the date for the planning application has yet to be reached, all the planned works have already taken place! We have had to endure an increase in noise levels from party-goers, and fireworks (particularly at weekends) coming from the direction of Mulberry Brook and the said lodge, and this is NOT what we want in our quiet, semi-rural, residential area. There is also what now appears to be the installation of an outdoor swimming pool at this address, which will only add to the unwanted noise levels in our area. To summarise, we strongly object to this planning application, and moreover that all the plans mentioned have already taken place, prior to any plans being passed. Surely this is breaking Kirklees Council laws?
