Plot 5 with the plans for a 4 storey property will not only obstruct the daylight but mean that we will be completely no longer private. This will massively have an effect on our living conditions. The protected trees have been cut down for this project which would have prevented this from happening. The proposed property is to be in keeping with plot 4 on this land which is a huge house not in keeping at all with the cottages or the other properties built on this area of land. It towers over everything. If plot 5 is to be built in the same way with the same outcome then we will be completely cut off from the sun and daylight to which we are now accustomed to. The character of this area has been compromised by 4 now coming up to 5 houses not in context with any other buildings in Grange Moor. This particular area was mainly cottages. Plot 5 will have an enormous effect on the rural environment as the design is totally not in keeping with the cottages below. The plot will stand so high in front of our cottages it will darken all our outside area to the rear The landscape has now had an irreversible change so much so that plot 5 will only add to the horrendous high rise properties built in our immediate view. We strongly object to the proposed building plans on plot 5.
