Dear Elly Worth,

I wish to express my upmost support for the planning application 2021/91367
Change of use from agricultural to storage and processing of timber, improvement of
field access, formation of access track and hardstanding and erection of wood store.

The proposed development would be an entirely appropriate use of rural land to
support a rural local business, providing essential local services and secure jobs for
local people now and in the future.

The sustainability and biodiversity gains of recycling local timber into dry logs,
planting trees and the enabling of "off grid" operations are hugely important. We are
all aiming to become more carbon neutral, as outlined in the Kirklees Climate
Emergency Action Plan.

The application proves that the site is more than suitable and sustainable for the
business to operate from and wholly appropriate in the green belt.

The activities of this business are in keeping within the green belt policies; therefore,
the application should be approved.
