User comments

Type of comment: A general comment	
Do you wish your comments to be published on the website anonymously?	No
We are the neighbouring property to the proposed suspended driveway. We would like to make comments specifically with regards to safety standards, given that the structure that will be suspended above our property access . We would like to be reassured that the proposed will comply with all regulatory and safety standards and that planners will look at the plans and scales from a neighbouring orientation. In addition we would like to understand what the structure will look like aesthetically and what size it will be and or any impact it might impose to us due to it's proximity to our property access
