Goddard****Responding Ref:CA52**

One mature tree, worthy of retention is located to the north of the site and falls within the Springwood Conservation Area. The proposals affect an area that is already hard standing having been used for car parking for some time and does not extend as far as the tree to the north. It is unlikely the proposals will result in harm to the adjacent tree's roots given the historical site use. I would therefore have no objection to the proposals.
