To put a filling station at this location would be completely out of character for the area, which is predominantly housing. There is a nursery and junior school in close proximity which has a lot of foot traffic coming and going. It is already difficult to exit the nearby housing estate at the top of Spen View at busy times during the day and we feel a filling station and retail kiosk will only add to the problem. Living at the back of the proposed site, we feel it will effect us should we wish to sit in the garden due to the increased noise levels of engines starting, doors slamming, music playing etc., and possible odours from the fuel. We are also worried about illuminated signs and what affect it will have on our property, especially on an evening/at nighttime.
