I wish to object to planning application 2021/91827 on the following grounds. The erection of yet another storage building in this location will further impair the habitat for wildlife. This is already evident from the preparatory activity that has been noisily taking place on the proposer's land. This wildlife includes bats which are a protected species, foxes and squirrels. I have been understanding in relation to the significant housing developments which have taken place in the 18 years I have lived on Greenhead Avenue. This has already significantly reduced green spaces. It has also increased the traffic load and congestion on a road which not too long ago was partially unadopted. I see the development as a threat to the natural light, not to mention the view, which I enjoy from the rear of my property. As part of a structural review I am having for my property, I am having my drainage surveyed in the next few weeks. I have serious concerns about the effect of reducing natural vegetation and tree felling on to build this storage building on drainage efficiency. After all it is not a priority construction, as it will not provide housing, and there are already many similar units nearby. I request that officers carefully consider the above points.
