The building of even more houses will destroy natural habitats for wildlife. There are birds of prey regularly flying here. The character of hanging heaton will be affected negatively as the houses will be in hanging heaton but will not be part of it with an entrance on challenge way. The traffic will increase on high street where there are already artic lorries rattling past at speed now on high street due to speed bumps on grange road and challenge way and traffic avoiding the speed bumps. There are many families with young children and a primary school nearly opposite on a bad bend on high street. Traffic will inadvertently increase even more onto high street and pass the school which is already at full capacity. Fumes from further traffic from the new housing estate will increase air pollution which already be reduced by the chopping down of trees and which could influence flooding. There are no traffic calming measures on high street and Kirklees even struggle to put up any speed signs not to mention carry out basic road repairs. How can Kirklees sustain more traffic, people, houses etc when they can't look after correctly the things they already have? Please do not build these houses.
