Councillors Just a little reminder, after all the pollution and noise surveys that have been done and have no doubt these have been swayed in the developers path, There are 400 houses as we speak been built off mill forest way, leading of Grange Road and further 280 houses been built at chidswell at top of grange Road. Maybe then you should look at the noise survey and the pollution. And want to build 55 houses on the bit off green space left. These builders are going to be digging down to put foundations in next to the main water pipe that feeds Hanging Heaton. Accident waiting to Happen there.Having to move telegraph poles, take trees down and the earth berm that supports a number items being raised many times. Disturb the animals that live here, This bit off green space left is natural flood plane. The six houses at top of high street have a natural stream running under them which quite frankly no one seems to know about apart from the residents who live there. There is brown land at the bottom of Grange Road, if it's felt you need to build more this site is the old puma factory which is actually bigger this in my eyes would be more appropriate
