I still object strongly to this development, there are just so many reasons why this should be rejected. There are so many cars (pollution) already around this area and there will be so many more when the developments already passed are built. Knocking down trees , won't just be the ones for the entrance but will effect many more. Trees and vegetation do take in fumes , that's why the goverment and Royalty are asking us to plant more trees. I know that's not the full answer we still have to reduce our emissions but the trees do help alot. The houses built on the land will not be quality living. Some of them stuck in a corner with road and petrol station and some very near the road. Others will be overlooked with our houses are on a slope. I still feel strongly there will a privacy issue for houses on High Street looking down. Vistry have said they will put up a higher fence but that really won't make alot of difference. We are supposed to be building on brown land first, there is an area at the bottom of Grange Road. The roads are going to be horrendous with all the extra traffic. Now the trees are losing their leaves we can see how much traffic is going up and down on Challenge Way. There will be a real problem for cars getting out of the development. Please think carefully as once built it will be too late. Thank you.
