I would like to object on the following grounds: The addition housing will increase traffic on the surrounding road network. Roads such as Crossley lane are not able to support increased traffic as they are currently used by a number of unsafe motorists and children and elderly, as well as adults who attend the adult learning centre, (to name a few) use these single track roads with passing places. It would increase the likelihood of an accident to the most vulnerable of our community. The area proposed for development has a large amount of wildlife that would be driven from the area. The country park next to the development will be affected by then increased noise and human activity. This is not environmentally friendly, nor is it a good long term advertisement for our area. The area is surrounded by green belt and this will increase the noise, light and general pollution is an area that is next to a region of greenbelt. I do not believe the proposal is suitable or representative of the area and should therefore not be approved or allowed to proceed
