I wish to register a complaint with regard to the above "variation of condition"

Caddick Construction have applied for so many variations for this site.

The hight of the earthworks was proposed as 2.5m to 3m above Slipper Lane, this embankment is currently higher than my first floor windows.

Caddick now want to change the planting/screening to the units from mature trees/shrubs to a wildflower/grass, which will provide no screening.

I believe this must have been the plan all along or total incompetence of the architect to design something and then declare it unsafe to plant.

I welcome your comments.
