I am raising an objection to the intended garden playgroup. The applicant mentions that there is plenty of parking on Sheffield Road and there most certainly is not. Residents there are already subjected to limited parking throughout the day due to surrounding businesses or visitors to other houses. Any parents who are intending to visit the intended playgroup will seek to park as close to the house as possible, which is directly outside our houses on Sheffield Road. It is unlikely that visitors to the intended playgroup would be asked to park elsewhere out of courtesy as this does not happen now with any visitors to the house. Cars parking on the opposite side of the road cause a hazard for any vehicles pulling out of Glendale Mills as drivers are unable to see oncoming cars coming around the bend. Throughout the day we witness many close calls with vehicles coming close to crashing. I am also concerned at the noise level created by 20 small children and their parents. It would certainly cause a noise disturbance for those of us who live in the surrounding houses. It is unrealistic to think that the children would not cause a noise disturbance. Pre school children are noisy by nature. Would they be told to be quiet if they started to sing or play noisily as all children do, I think not.
