i live area proposed and with there already being one car wash in this position i know whats going to happen. firstly the water soaks my garden making it swampy so unable to use and the plants and flies grow like mad. im 6 foot lower in elevation so all the sunlight is needed not hindered more by glass screens. the car washes are used throughout the night mostly by youths at this time and it wakes me up. and already its a nuisance a new one even closer will be a nightmare. if they had to pick up the amount of food packaging that blows into my garden from the garage they would put up a fence. i just dont want a 24 hour car wash outside my bedroom window and get enough trouble from there as it is
