Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	No
Please can the Council consider the following: • The house is now doubling in size with two bedrooms whereas originally it was a one bedroomed house. Surely this additional level takes the property from affordable housing to unaffordable housing. • This also begs the possibility that up to four people could potentially live in this property. If they have at least two cars, where are they going to park? Currently there is only one designated car parking space outside the property; no visitor's space has been allocated. • Additional people mean additional traffic. The drive is an unadopted road of poor quality and even after properties have been developed previously, has not been improved to cater for the new houses. Thank you.
