

Subject: FW: 2021/93275 rear of 120 Laund Road, Salendine Nook

Yes I agree – we'd be looking to collect directly on Laund Road if we can so a collection point closer to the edge of the development would be better. We operate a standard sized vehicle on Laund Road so wouldn't want to have to send out an additional smaller vehicle to enter the site if we can avoid it. The only issue will be the drag distance for the furthest properties – looks like it will be well in excess of the recommended 25m. First preference is to preserve our ability to collect with a large wagon from an adopted highway, if this creates issues for residents in the future then we would liaise directly with them to agree an alternative presentation point. If we can use the condition to secure the first preference then we can keep options open.

Thanks,
Carol.
