<p>The properties look directly on too our house. Which will mean we do not have any privacy. Which will encounter noise from the properties. There has already been planning for out line for caravan storage and only one mobile home was stored. Our planning was objected for an extension and we look on to no one. We have lived here 30 years and have no invasion of privacy at the moment these are farm building where Animals are supposed too live the land wasn't for houses. It's not suitable for a small development as there will be more cars using the road. which is more pollution. It's bad enough converting the cow sheds to look like houses which don't even fit with in the area of the house what are already built.</p>
