<p>The out line planning permission on the plans the out line enter our land. if you look on the land registry they are on our land. There are the caravan plans and then the plans for the development the original plans are in line with the boundary lines and what is actually on our land registry plans but each planning permission Mr Simon Blyth puts in is more and more on too our boundaries. And further too our complaint we would of liked too have converted a mistal which adjoining our house but was told by Nia who was our planning officer we would have to take it down please tell me if there was only going to be windows looking on too our house and our business with no windows facing the farm house out the adjoining barn why was we told this when Mr Blyth seem like he can just do what he wants.</p> <p>When he's completely altered the structure of the whole farm and put up a boundary mound of soil all the way around which he did not obtain and planning permission and who knows what has been put on the mount to make a boundary wall. It runs right up the side of Buckleys dairy.</p> <p>Which we always apply by the rules and apply for planning permission at all time. But yet we can not have what we want.</p> <p>I hope you take our objections and look at them at these house don't just over look us but over look the farm house and the adjoining barn.</p> <p>Kind regards</p>
