| <p><b><u>Comments</u></b></p> <p>The applicant has submitted an undated and unreferenced Extract &amp; Ventilation Statement from Rotoquip which is a general statement on the installation along with data sheets from fan and filter suppliers.</p> <p>To assist the applicant, para 5.08 of the submitted Noise Impact Assessment authored by Environmental Noise Solutions dated 29 March 2022 Ref. NIA/10167/22/10267/v1/Lockwood Road states detailed information regarding item(s) of fixed external plant required was not available at the time of writing. Table 5.2 provides the highest permissible free-field rating noise levels from external plant at the nearest NSR to avoid potential adverse impacts with a caveat at paras 5.11 – 5.13 to ensure it is selected, sited and installed so as not to lead to a loss of amenity. The applicant will need to ensure the noise from the proposed mechanical plant does not exceed this level.</p> <p>The applicant is also reminded that an odour assessment will be required and that part of the assessment requires information on the noise mitigation measures that will be incorporated in the extract system and details of the likely resulting noise levels that will be caused by operation of the extract system, in particular how loud it will be at nearby noise sensitive locations.</p> <p>The applicant will need to ensure any submitted information meets with our requirements.</p> <p><b><u>Recommendations</u></b></p> <p>The submitted information does not meet with our requirements and our previous recommendations remain.</p> |                                               |                                        |
