Good afternoon,

I am writing my concern of the planning application that has been taken out, for the resubmission for

Land off Fullwood Drive,

Golcar,

Huddersfield

for 13 dwellings.

Application number: 2021/93621

Reference number: 2021/93621

I strongly object with the planning application, our house has been in the family since it has been built, there is and Japanese knot weed that has been there for years. This will be an invasion of privacy as we have 3 windows looking onto the field, This is a busy road as it is, putting an extension road threw will make it near impossible

On 20th October 2020 a guy without any notice to residents brought a digger onto our road leaving dirt scratching up the road and ripped up everything in the field, this is before anybody had any idea about what was happening, we all got home to find the once beautiful, nature filled field had been dug up, they proceeded over the next several days to dig this field up before 0700am, they have left 2 huge waist piles in the middle of the field, leaving it untidy and unpleasant to look at.

This field is just starting to grow back the animals around are slowly starting to appear again, everybody who lives around this area is still highly disappointed by this matter.
