Good afternoon,

I am writing my concern of the planning application that has been taken out, for the resubmission for

Land off Fullwood Drive,

Golcar,

Huddersfield

for 13 dwellings.

Application number: 2021/93621

Reference number: 2021/93621

I object to the building on this road, I own this house and it has been in my family since it was built and has been passed down through the family, the land has and Japanese knot weed and bats, we already highly disappointed from the works that was done on the field without any notice on the 20th October 2020, they came into the field with a digger and destroyed the natural habitat that was homed to loads of animals and insects, they housed bird nests in the trees that they have ripped down, all that is left is 2 huge waist piles in the field that I have to look at. Not only did they rip all of the natural nature out of where it should be they came in scratching all of the road up, and putting harris fencing up and a portable toilet in the way of where a parking space is allocated for home owners or visitors.

I have 3 windows at the side of my house overlooking the field, as well as all of my other windows having view of the field, it would be an invasion of privacy to build houses so close, the field is just starting to grow back and the nature that was scared off have slowly started to come back.

The road is already a busy road with 21 houses on it, I do not want a threw road adding or to have to look at more houses and people or have people being able to see threw all of my windows.
