Evening

I just wanted to raise my objection to the proposed housing development in the fields at the end of Fullwood Drive. Having grown up on Fullwood Drive and now living nearby on Clay Well, the area is unsuitable for extra housing, traffic and parking. The roads are already almost impossible to drive down without coming up against another car and having to reverse right back down narrow roads, with no passing places. Adding further traffic of not just people who live in the area, but delivery trucks and visitors, will make the roads absolutely impossible.

The field is home to plenty of wildlife including bats, foxes, , and it seems that the development has already blitzed the field with no regard to any of this.

Local doctors are already impossible to get appointments at, there's no dentist available, schools are full. There has already been developments built at the bottom of Carr Top Lane (also a nightmare to drive down, waiting for a break in traffic so you can make your move), and at the bottom of Leymoor Road (also a gauntlet of double parked cars).

Winter in Golcar is hills of ice and snow, and adding further potential cars trying to drive down narrow roads packed with cars is likely to cause damage to property. And the road condition is likely to become even worse (which is saying something). I have burst a tyre before now on a raised man hole cover after it became exposed when cobble stones were worn away through water running off the hills, which is still not fixed.

Why add more housing to an already over crowded area??

Cheers
