

Good afternoon,

I object to the Erection of 12 dwellings off of Fullwood Drive,

2021/93621

Please keep my details anonymous,

I have lived in my home for 6 years, it was peaceful and full of nature, the perfect place to start our family, it's a safe road. The other year some builders came and destroyed the field next to where I live, newts were killed, owls and bats were kicked out of there homes and Indian balsam were pulled across the whole field, mature trees were destroyed pulled out and ripped up, they left all of the dirt and debris close to our home, for us to stare at, they knocked down our beautiful drystone wall got rid of all of the stone and put Harris fencing up, they left a toilet in the middle of the road were we park our cars, they scratched up the road and no warning was given, I worked nights when this happened and they started with the noise at 0730 in the morning, no letters was given out to residents.

We have 1 doctors who is over run with clients and can't see the ones they have, our nursery and junior school is over crowded with applications coming out of there ears because of the high demand, we don't need more houses, we need to leave nature alone.

21 houses on our road is plenty our road is narrow and home owners have to park on the road as it is causing it to be tight, we have an issue with flooding water coming from the top houses, this is dangerous in winter as our road turns to sheet ice, my baby is born next month this home is where he will be brought up, I want to teach him about nature not having to hide him from the people who will live in the field opposite.

Children have always been safe to play on our road, because it's quiet and everybody knows everybody, bringing more people in is unsafe, never mind huge safeguarding involved for the people it will bring, please can we just leave nature alone for once and keep this a quiet road.

There is already too much noise coming from the new houses in the other field that they have built, we don't need more houses, we need more privacy, I don't want to wake up in a morning to be stared at by some random stranger looking through my windows. This planning request should of never been put through, it should be permanently rejected, there's not much land and greenery left in this beautiful village, we need to hold onto the last bit we have left, go and build out in the moors leave our village alone.
