Application number: 2021/93644	
What is the application for?:	Erection and operation of grid-connected solar photovoltaic farm, with ancillary
Address of the site or building:	Low Farm, Wakefield Road, Flockton, Huddersfield, WF4 4BB
Postcode:	BN18 0AG

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
why do we need to build solar farms on good quality Farmland Farmland is a prime source to produce good quality food instead of importing so much food why do we need to cover it with solar panels create flooding and run off there is so many big industrial units which could be cladded with solar panels and it would create no more water run off and it already creates this to me is not going green by destroying all that good Farmland when there is plenty of better places where to put the solar panels this to me is not about being green it's about big companies trying to make lots of money for shareholders
