Dear Kirklees Planning Authority I write in respect of planning application 2021/93644. Recent times have highlighted like never before the importance of easy access to green open spaces for people's mental health and well-being .The consequences of granting planning permission for the industrialisation of these accessible open spaces are far reaching and will impact on the residents of local communities for generations to come. This planning application is not the answer to any renewable energy targets .There is nothing green about the loss of prime agricultural land .There is nothing green about the industrialisation of the countryside. This is profit for the few at the expense of many. I would urge Kirklees Planning Authority to act in the best interests of the communities they represent and reject this application . Kind regards A. Local Resident
