It really saddens me to think that this beautiful 210 acre greenbelt site with its footpaths (one being the Kirklees way) and bridle ways could be turned into an industrial site. The impact it will have on wildlife is monstrous . These greenbelt fields are a feeding ground for many types of birds of prey .They are nesting sites for lapwings and skylarks. Homes and feeding routes for badgers , deer, hares and many more animals. Fencing off these areas will sadly destroy these creatures and no doubt they will end up being road kill. Solar panels have a place and I believe brown belt sites would be more acceptable. New builds can be encouraged to use solar roof tiles . Please leave this stunning area to carry on providing crops for humans and homes and feeding grounds for wildlife... please .
