Strongly object to this proposal.

This proposal will be devastating for the natural environment and wildlife of which there is an abundance in this beautiful rural pocket of Kirklees. It will turn a farming landscape into an industrial zone.

Our property is shown to be in a possible glare area. This is deeply concerning as a resident. This could also impact the safety of drivers of the A642 along with the walkers on the Kirklees way.

If it is necessary for Kirklees to have solar energy surely there are more suitable sites within the Kirklees area that will have less impact and not take farming green belt land. With the impact of climate change and the need for the UK to produce more of its own food why take productive farm land.

The proposed solar panels will be surrounded by trees, if these effect efficiency will it result in felling?

The erection of high security style fencing in a green belt area will massively detract from the areas natural beauty along with inhibiting the wildlife.

Impact of heavy plant, increased traffic and dangers to the public along what is already a very busy highway.

This area is green belt, it must remain so.
