Once again these amendments have made no significant changes whatsoever to satisfy the local population! In a time where supermarkets and suppliers simply can't get the produce surely now more than ever we need our farm land working for us to provide much needed food. Why are we not putting these solar panels on the roofs of the numerous factory roofs and Warehouses Kirklees already has? Our farm land and green belt is very precious to a small island like ours (England) and must not be taken away to be wasted like this. Just on another note this company that is wanting this solar farm, is from the far south of the country so why not build this in there own back garden? Also it's promoting nothing for the local employment structure!!! Finally the site at full capacity will exceed the allowed output capacity contravening allowed regulations.
