I have concerns regarding the new build adj 136 Laund road. I feel that this building will invade the privacy of my household and back garden. The rear of the property will be facing my lounge and children's bedroom. The plans as per the Kirklees website show that the new build will have tree's at the rear of the garden which is a concern for the sun light in my garden and house. We have already had tree's cut down from our house as it was blocking the sun/natural light and the leaves were clogging up our guttering. Having paid for a house with a south facing garden, we would like to benefit from the sun/natural light. Another concern is the traffic on Laund road. There are already far too many cars on Laund road and the parking is appalling and often dangerous due to the amount of cars, lack of parking and individuals speeding. Adding another household will inevitably add more congestion and pollution onto Laund road. There are lots of children in the local area with the schools, college and local shopping centre so adding more people and vehicles is very alarming.
