<p>Here we are again, but the arguments still remain the same. It's difficult to access this land which means using Primrose Hill till they have built a bridge on lady Ann rd which means yet more heavy traffic delivering machinery/ building materials . After 2 years of the railway building a footbridge I think the residents have had enough for the time being! The proposed bridge will involve culverting the beck this will affect the protected water voles apparently the last colony in Kirklees, there's bats too that hunt on the land . Culverting will force more water downstream to Bradford rd a well known flooding area. Would that then become a council problem ? 65 new build houses won't fit in with the Edwardian style housing we have. 3 story town houses will cut out some of our light Have we enough infrastructure schools doctors etc.</p>
