| <p>It's the same argument as the last time. Access on to the land is via lady Ann rd and then up Primrose hill both difficult for larger vehicles and heavy equipment. They have to build a bridge across lady Anne beck which will need culverting to support a bridge. The land they want to build on is a hill will need flattening out to construct housing filling in the flood plane, this will cause-problems for the council as in more flooding at the bottom of Hick lane/Bradford rd. the flood plane is a habitat for a colony of water voles the last in west Yorks a protected species and the higher land is hunting ground for bats. 65 town houses do we have the infrastructure schools ,doctors etc. new houses won't fit in with the Edwardian housing of the surrounding area.</p> | |
