User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
siting a source of high radiation in the middle of a residential area is totally wrong, especially with the advent of 5g which has even more dangerous effects the proposed site is very close to housing and way too close to the local primary school to be 'safe' this application is opportunism at best and should be rejected on safety grounds alone, never mind how ugly and disingenuous it would look in the middle of a village
