4. Description of Proposed Works

Please describe details of the proposed development or works including details of proposals to alter, extend or demolish the listed building(s):

There are a number of natural stone steps outside the property of 5-9 Dundas St. These stone steps are part of the original feature of the building and were once used to access a doorway into the building. In recent years the doorway has been blocked up and turned into a window rendering the steps no longer required for use. Dundas St is undergoing public realm regeneration works to widen the footways and provide a safer street space for pedestrians and upgrading the materials used to tie in with the historical buildings. Part of this is to remove the redundant steps outside No.5-9 Dundas St to provide a wider and more aligned footway space for all pedestrians and vulnerable users.

Details of the pre-application advice received

Discussions were had in regards to the significance of the existing steps and the impact this would have on the original building if these were removed. The stone steps are not attached to the building and as such would not result in any significant loss of the original fabric to the former doorway entrance. As the original doorway has been blocked up and turned into a window for many years, Nick's opinion was that, the removal of the steps would have a minor adverse heritage impact and therefore a low level of harm to the original building. The steps further along the street are to be retained as are the steps to the lighting shop and the existing fencing to the lighting shop is to be replaced with like for like railings which is in keeping with the existing heritage of the buildings along Dundas Street.
