As a resident and regular walker in this area, I see a number of houses on Central Avenue surrounding streets have lost their front gardens entirely to car parking. I feel the Council currently gives no consideration to 1) the environmental impact of hard ground cover for car parking and 2) where all the displaced rain water actually goes from these schemes - it is certainly not down the blocked drains in the gutter along Central Avenue! This application makes no mention of how much hard ground cover is to be installed, nor where the displaced rainwater will go. I further object to the arrangement of the off street parking. The snicket/ginnel from Ashbrow Road enters Central Avenue next to the proposed new driveway, meaning which ever way pedestrians turn when leaving the ginnel, they need to immediately negotiate driveways and vehicle movements. This is a popular walking route for school children on school days. Lastly, the proposed extension projects outwards beyond the existing property lines along Central Avenue thereby jarring with neighbouring properties and spoiling the view along the street for other residents and users of Central Avenue.
