This application seeks approval to the discharge of conditions 5 (Construction Environmental Management Plan) and 6 (Construction Management Plan) of previous reserved matters approval 2021/91638 pursuant to outline permission 2016/91479 (appeal APP/Z4718/W/17/3173711) for erection of 22 dwellings at Land at Hart Street, Newsome, Huddersfield.

The previous highways consultation response dated 18th March raised two issues with the proposed Construction Environmental Management Plan condition 5 and Construction Management Plan condition 6 as follows:

*Condition 5: No details of adequate visibility are provided.*

*Details of the visibility from the proposed egresses from both Hart Street and Newsome Road should be provided.*

Plans are included within the and Construction Environmental Management Plan showing 2.4 x 43m visibility splays at both the Hart Street and Newsome Road junctions.

Highways Development Management have therefore no further objection to the discharge of this condition.

*Condition 6: Hart Street could be a route to the Hillside Primary School and vehicle movements and deliveries should be restricted to avoid the peak drop off and pick up times for the school.*

The Construction Management Plan now states that deliveries will be scheduled to avoid peak drop-off and pick-up time at nearby schools. Discussions will be held with the local schools to confirm peak drop-off and pick-up times.

Highways Development Management have therefore no further objection to the discharge of this condition.
