<p>I would like to voice my objections to this proposed development.</p> <p>I was born                      I have lived on Whitechapel Grove, Scholes all my life and in that time have seen many changes take place in this village and quite often not for the better, but the proposed development would be the absolute worst thing that could happen.</p> <p>In this present day the amount of traffic we have through the village is already a major concern to the safety of the children, elderly, disabled and well and fit people. As soon as an incident occurs on the motorway or main roads the area becomes a car park literally trapping us residents. I do believe the company proposing to build this has offices just off Junction 26 Chain Bar and will be fully aware of the chaos that is caused already, I do not believe the area could cope with the addition increased traffic this project will bring. As we all know children must use this route to walk to local schools which will put them at increased risk. We also have to remember the amount of flooding in this area which affects traffic on a regular basis the latest being only a couple of weeks ago.</p> <p>As a local resident we will be affected by the amount of noise this project will bring its bad enough when there is complications during the night on the motorway, but we will have increased traffic 24/7 the banging and clanking of lorries and vans being loaded and unloaded along with the load alarms on the reversing warning systems. And I am sure there will be much more noise in addition to this.</p> <p>Light pollution will be increased absolutely ruining the local area. This will directly affect the residents who live near the proposed site.</p> <p>This could cause huge damage to wildlife and wild places. We are seeing the loss of irreplaceable ancient woodlands, wildflower meadows, wetlands and other rare habitats due to development happening in the wrong place. Schemes to protect rare species are often ineffective and wildlife becomes restricted to increasingly fragmented areas. We have deer's, badgers, bats, owls and many other wildlife in this area.</p>
