<p>The proposed area is located on a blind bend. The road is already extremely busy, used by both vehicles and pedestrians; in particular school children travelling to and from school. In one area, opposite the proposed site, there is no pavement. This is extremely dangerous especially at busy times; and would be made even more so due to the extra traffic this proposal would create. Golcar already has more than enough new houses, creating a high volume of traffic which the village can currently barely cope with. There are already a shortage of school places and health facilities. What is needed is a new health centre and not more houses as the area does not have the facility to cope with more inhabitants and increase in the volume of traffic.</p> <p>There is also the environmental factor regarding local wildlife that currently inhabit the area - birds, bats and foxes. Their habitat would be destroyed. In addition, the fields across from the site which are home to horses. The noise of construction with surely affect them, not to mention noise which will affect the school close by.</p>
