Note*

The interior of Halcyon House at time of writing, is fully exposed i.e. floors are in place but ceilings are yet to install. It was therefore possible for me, at the time that I surveyed the property for this application, to inspect for bat roosts from eaves to ridges as the roof was totally exposed. As the shell of the structure has not been long completed, it was evident that there was no means of access for bats nor was there bat activity within the dwelling. I suggest that a bat survey in this instance would be a formality and a waste of resources.
