TOWN AND COUNTRY PLANNING ACT 1990
Town & Country Planning (Tree Preservation)(England) Regulations 2012

NOTICE OF REFUSAL OF CONSENT TO FELL AND/OR PRUNE

Application Number: 2022/91196

In pursuance of its powers under the above mentioned Act and Regulations and the Tree Preservation Order made by the Kirklees Metropolitan Council (hereinafter called 'the Council') as Local Planning Authority and pursuant to the application submitted to the Council on 05-Apr-2022:-

THE COUNCIL HEREBY **REFUSES** TO CONSENT TO THE CARRYING OUT OF THE FOLLOWING OPERATIONS TO THE PROTECTED TREE(S) TPO No.07/80

At: Rear of, 91, Dunford Road, Holmfirth, HD9 2DU

Remove Sycamore due to repairs proposed to retaining wall

The **REASONS** for the Council's decision to refuse to grant consent are:

1. This tree is a significant and prominent landscape feature in the locality and as such contributes to public amenity and character of the area, consequently the grounds for its removal must be weighed against the amenity and benefits it provides.
2. The proposed wall repair would require too much rooting area to be excavated to allow the tree to survive but there was no information submitted with the application

regarding alternative solutions for the wall's repair which could be used to allow the wall and tree to co-exist.

3. It is not possible to predict the risk of a tree causing structural damage merely by considering its size and proximity to a wall. The retained land and hydrostatic pressure could have resulted in the section of wall collapsing. Accordingly, I do not consider the unsubstantiated risk of future structural damage to a repaired wall occurring warrants the removal of this tree.
4. There was no evidence provided with the application to demonstrate that the tree's structural integrity had been affected by the wall collapse. Trees such as these could cause damage and or personal injury if they failed but that can be said of any tree and is rarely, if ever, a reason to justify removal of a healthy protected tree. Moreover, the tree is mature and has been growing at this location for many years; it is adapted to its normal wind environment and no signs of root plate movement or other signs of potential failure were evident.
