I wish to object for the following . 1) The new houses are 3 story high and are completely different to neighboring houses in design and height. 2) The land the amazon building development is proposed on , was deemed unsuitable for housing , what is different to this land , as it was done the same time ? 3) The area is on old mine works , what works and investigation has been done , to deem this wont cause issues to current houses ? 4) The entrance (on an incline) is near a proposed Amazon warehouse development entrance, this would add to the issues of traffic and safety on this busy school route. plus impossible to turn right ? 5) There is currently already large housing developments near by. 6) What is in the design to protect the new homes , for noise and pollution and lights if the Amazon development gets approval . 7) most houses now have 2/3 cars , is there enough parking spaces , that would also allow visitors to park, with out parking on Whitechapel road.
