Address of the site or building:	Land off Lindley Moor Road, Lindley, Huddersfield, HD3 3SX
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
This specific area has already been designated as a high pollution zone that directly impacts over 30 new build homes. Will the council address existing air pollution issues before considering this proposal? The development proposal is open-ended and should be more specific. The industrial element (warehouses/ distribution centres for parcels) is the main concern here, as it will negatively impact, noise; pollution; light obstruction; nature; scenery; and safety of pedestrians. It is clear this proposed site will increase the number of cars leading to further elevation of pollution above recommended regulatory levels. This will have an impact on the health of residents! The proposal is very strategic in nature, the council will have to decide what part will be approved and what alteration will be required. I am all for quality services to enhance the area on a much smaller scale! Industrial units should be out of the question here. It is inevitable some part of the site will go ahead, but please use your power to ensure this is for the benefit of the local area and not another grey industrial unit, similar to the one approved further up lindley moor road.
