This proposed development would be of no value to the local residents. It would however cause further congestion of the roads in this area which are already overcrowded. Certain roads such as Yew Tree, which have become rat runs, are deteriorating rapidly and reaching a condition where they are not fit for purpose. On a personal note the largest building of the proposed plans is directly opposite our own property at 16 Alderstone Rise and will completely block our northerly aspect. For these reasons we are opposed to this developement .
