Do you wish your comments to be published on the website anonymously?	Yes
I am appalled that you are thinking about allowing more destruction of our natural habitat. When will it end? Our wildlife is sacred and this is going to destroy so much. Has a full assessment been done on the impact of all wildlife? I doubt it very much. What about the bats that live there not to mention all the other species that don't get a look in. Highburton and Lepton will almost be one community. Please rethink for our wildlife's sake
