I totally agree with the general views of everyone in the village that this plan is complete desecration of our local beauty spot. The vast expanse of meadow should be protected and cherished we should be protecting our wildlife and natural landscape, green belt areas all within a view of castle hill. Why don't the planners build as many houses as they want in Dalton on the derelict site on Crossley Lane. Not to mention the traffick and infrastructure issues. To me this is just profiteering on a grand scale. I have lived in Lepton all my life and use Lepton great wood daily as I live across the road. To me this plan seems like utter madness and desecration of the environment we cherish. Disgusting!
