<p>The fact that an ancient woodland is going to be destroyed in order to build homes on is enough of a reason in its own right. Green belt land, an organic habitat that's existed for many, many years, home to wildlife, not to mention a local feature for those residing in Lepton and beyond.</p> <p>You cannot replicate what will be destroyed simply by planting new trees, it will take many years, meanwhile the woodland inhabitants will be displaced, die, scatter, the upheaval will be significant.</p> <p>The additional congestion that will add to the groaning weight of vehicles already contained with the area, the Lepton infrastructure will feel the burden of dozens of new families, not to mention the fact that Lepton residents will yet again be under siege from heavy goods traffic, temporary traffic lights, the noise, mud in winter, dust in the summer, a village that has been at the mercy of all manner of utility companies of late, and everyone is incredibly weary of it, without a huge estate being built on land that's appreciated by all.</p> <p>Please don't grant permission for something that's going to start off with destruction, and end with even more residences/traffic that will, absolutely, push the local infrastructure over the edge.</p>
