<p>The infrastructure in Lepton is already at breaking point. The school at Rowley lane has already caused major congestion with the current volumes of parents parking on the road when dropping off and collecting children. Rowley lane junction on to penistone road is currently a major block due to the amount of traffic. Regarding the effects on the environment there are bats, red kites owls and badgers living in the woodland adjacent to and in the field allocated for development. Kirklees has not taken any of the residents voices into consideration with these new development proposals and continue to plan and build development in green belt areas. I am already concerned about the current road congestion issues and speed and volume of traffic through the village. I have little doubt this plan will be rejected as the common person has no voice in the current political system Kirklees run. Totally disgusted with the whole bureaucracy of Kirklees and its so called team working for the community and environment.</p>
