Comment about planning app ref: 2022/91835

We generally welcome the proposed plans as we hope it will vastly improve the visual aspect for all residents of Bargate who overlook the current ramshackle scrapyard.

Although we do have a couple of respectful suggestions, the first being the possibility incorporation of sound proofing to the (Rear elevation of Building A)
as this would greatly improve with the ongoing noise pollution issue currently experienced.

The second and most prominent suggestion/request is the colour of the external profile sheeting material used to clad the proposed new buildings.
We strongly believe this should be of a dark shade of Green as this would be easier on the eyes and blend in well with its rural surroundings.

We look forward
to your response.

Kind regards
