Hi John

Thank you for forwarding the additional information relating to this application.

I have now reviewed the revised Construction Environmental Management Plan (Rev B Jan 2024) and the highways comments I made previously have all been addressed within the amended plan. With these changes HDM are happy to see the CEMP condition removed and the revised CEMP now accepted as an approved document within the application. I will add that this acceptance only refers to the sections that deal with highways related impacts and does not cover the majority of the Health and Safety information contained within the CEMP which is beyond the remit of Highways.

Cheers

Chris
