Subject: Evidence

Dear John

The ‘survey’ conducted on Wednesday the 21st in response to ‘anecdotal’ evidence is wholly inaccurate.

Highways have in fact conducted a survey of the area. This was in response to all the complaints and an application for permit parking.

Kirklees have received several complaints through the website to planning and highways , to Councillors and cabinet members.

We the residents in the area have collated evidence over the years and not just a day in the life of a veterinary hospital!
