Good morning,

I've chosen to email you regarding the planning permission in lindley. If the care home is being built on Thomas Street in lindley the following must be considered!

Parking is absolutely awful in lindley, especially when we can't park anywhere near my own house after work. There was a petition to turn the spare land on Thomas Street into a car park as parking is badly needed however this has not seemed to make a difference.

I'm not against the idea of a care home at all! Just to make that clear, although parking is a major struggle as the surrounding houses were not built when cars were around.

If something like this is going to be done more parking is needed, not only for the homes visitors and staff but for members of the public aswell. I have a permit for parking outside my house however this is always taken up by shoppers ect that do not.. they should have there own parking for a village that is only growing.

I hope you take this into consideration.
Kind regards,
